

eBridge Software ePortal Now Compatible With Blackberry Storm®, Blackberry Bold® And Apple iPhone®

eBridge's web-based business transaction management software (ePortal) is now compatible with the Blackberry Storm, Bold and Apple's iPhone.

BURLINGTON, Ontario (January 13, 2009) – eBRIDGE Software, the leader in business software integration solutions for EDI, CRM, SCM and web store fronts, is pleased to announce that its web-based document management system ePortal has passed testing for compatibility with Apple's iPhone and the Blackberry Storm and Bold mobile devices.

This compatibility will allow our eBridge customers to access their documents via their mobile devices anywhere, anytime. Blackberry and iPhone compatibility will provide users with a host of advantages including:

- Instantaneous review of non compliant documents: receive notification and immediately review and correct errors for non compliant EDI documents anywhere, anytime on your mobile device;
- Provide constant monitoring – continually monitor status of critical transactions with your mobile device while on the road or out of the office;
- Total control – remove the boundaries of the office; provide the ability to ensure the most important business transactions are smoothly sending and receiving to your trading partners anywhere, anytime.

Having the ePortal as a web-based software as a service (SaaS) solution enables eBridge to ensure a client can use the latest advances in mobile technology to access their mission critical business documents. "Extending the reach of integration as a service (IaaS) to the SME market is a critical component moving forward" explains Colin Brown, CEO at eBridge. "This enhancement of mobile functionality will allow our clients to leverage the software as a service model (SaaS) well beyond the capabilities of the traditional applications on the market today."

All other brands, product names, logos, company names, and trademarks are the properties of their respective owners.

About ePortal

The ePortal Software-as-a-Service (SaaS) platform has been proven a powerful business integration engine in the small to medium sized business (SMB) market, with its ease of use and short setup time required for vendors to implement. ePortal was designed with Web 2.0 architecture in mind and so, provides the ability to view inbound and outbound documents in a user-friendly format from any

remote station that has access to the internet. Web-friendly interface forms are used to enter data for outbound documents, which are then sent to the trading partner in the required EDI format. Our ePortal software as a service solution uses flexible and soft-coded XML technology as well as support for numerous EDI formats (ANSI X12, EDIFACT, etc.), resulting in an independent and flexible Integration Solution that effectively integrates with your financial system while meeting your company's unique internal business processes.

About eBRIDGE Software

eBRIDGE Software, founded in 1993, leads the small medium enterprise (SME) market in accounting software integration. Our powerful combination of Integration-as-a-Service (IaaS) ePortal—including over 250 predefined connectors, such as EDI, ecommerce, CRM, and warehouse management—and our eBRIDGE adapters for over 37 accounting packages, makes eBRIDGE Software the only last mile integration-as-a-service company to offer the widest range of integration possibilities in the market today. This complete and flexible integration solution streamlines your business processes, saving you time and money.
