DVD distribution company uses Integrated EDI Solution from eBridge Connections to improve data exchange

A DVD distribution company with headquarters in Toronto and Los Angeles, needed a robust EDI solution that would connect with Sage Business Vision and streamline business transactions with a number of different trading partners.
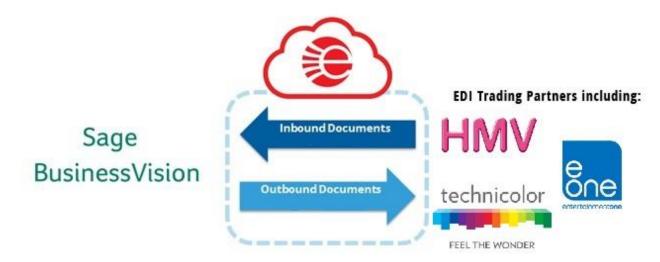

The Situation: Needed an EDI solution in order to do business with various trading partners.

This company contacted eBridge Connections, searching for an integration solution that could successfully integrate with Sage Business Vision and would allow them to streamline business transactions with their customers and trading partners.

The Solution: EDI document integration with Sage Business Vision

eBridge Connections provided the DVD distribution company with a cost effective integrated EDI solution that would improve the speed and accuracy of their data exchange.

In order to automate EDI document processing, the eBridge Professional Services Group connected the company's Sage Business Vision application with the eBridge Connections integration platform. Next, the solution was configured to retrieve outbound documents from Sage Business Vision, convert them into an EDI format, and send to the company's trading partners for processing. From the other direction, inbound EDI documents from each trading partner were set up to be retrieved, translated, and imported into Sage Business Vision.

The Results

eBridge Connections built an integrated EDI solution for the DVD distribution company that was highly flexible, cost effective, and helped them improve the speed and accuracy of their data exchange. "We are very satisfied with the overall results of this project," said the company's Operations Manager.

What would you say to other businesses considering eBridge Connections?

"As a DVD distribution company, we needed an EDI solution in order to do business with a few of our customers" said the Operations Manager. "We did not consider any other vendors because eBridge Connections was able to provide us an effective EDI solution that integrated with Sage Business Vision, making them the perfect fit for our company."

About eBridge Connections

eBridge Connections delivers powerful, cloud-based ERP and accounting integration solutions that automate vital business processes and eliminate the need for manual data entry.
